OBJECTIVE

As an accomplished developer with 3.5+ years of experience, I specialize in both React Native and React. My expertise lies in creating cross-platform mobile applications using React Native, while also crafting responsive web interfaces with React.

SKILLS

- **Languages:** JavaScript, TypeScript, HTML, CSS
- **Frameworks/Libraries:** React Native, React js, Redux, React Navigation, React router, Nodejs, Nestjs, expressjs
- **Tools:** Git, JIRA, VS Code
- **Testing:** Jest, Mocha
- **Other:** RESTful APIs, Firebase, AWS, Agile/Scrum methodologies

EXPERIENCE

SENIOR SOFTWARE ENGINEER

Techstalwarts Software Development LLP

January 2021 - Present

ROLE: Senior Software Developer and Team Leader

- **Managed and Lead software development teams** in building high-performing web and mobile applications using **React** and React Native.
- **Implemented modern front-end technologies** to ensure code quality, maintainability, and adherence to best practices.
- **Developed user-friendly interfaces** by collaborating with designers and product managers to translate requirements into React and React Native applications.
- **Collaborative team** player with a track record of successful multi-technology project execution.
- Familiarity with software development **life cycle methodologies** (Scrum, Agile).

PROJECTS

REACT PROJECTS: -

Client - GetKredit - Real Estate CRM System

- Created application from scratch using **React js**,
- Led Frontend Team, Understanding requirements from clients, PR Reviews
- Deployment on AWS EC2
- Implemented ACL for 10+ user roles
- Used Saga for Asynchronous data handling across the application.

Client - Aditya Birla (Admin Panel) - Channel partner for Aditya Birla

- Created Application from scratch.
- Implement Redux Toolkit and RTK Query for efficient data handling and Api calls
- Managed team, PR reviews, hotfix etc.
- Meetings with clients for requirement understandings

Client - ICICI Prudential Mutual Fund - Leading Asset Management Company in India

- Developed Core internal applications on react **ensuring security and VAPT points**
- Visiting client office for meetings with Higher authorities
- Worked closely With **Capgemini Team** for delivery of major products. Had to ensure every product delivery on time, communication with higher levels, etc.
- Worked in backend in NodeJS (Nest js) for creating proxy layer between front end and backend
- Led frontend team for internal applications, build creation, reviewing PR's etc.

Client - V5 Global - One of the leading manpower providers and resourcing solutions delivering end to end Sales & Marketing solutions

- Created **Vendor Portal** from scratch using React Js and **Maintained & Upgraded** Existing Admin Panel Consisting of 7+ user roles
- Created Common package and uploaded to private NPM Account for better reusability.
- Optimized and reduced re rendering issues in Admin Panel. Conducted a thorough **cleanup of the repository** to remove redundant code, improve code structure, and enhance overall readability
- Implemented graphs and Notifications in Vendor portal, Api Integration, etc.

Client - Lendenclub - India's largest P2P Lending Platform

- Maintained and upgraded existing Portal consisting of 5+ user roles including Channel Partner, Risk Manager, and Operations etc.
- Optimized the existing flow which included prop drilling in 5+ files by using Redux
- Upgraded performance of the applications using cache, and other React features for all of the applications
- Created Separated Admin Portals for different user for better user experience as per new requirements
- Deployment of frontend on AWS EC2
- Meeting with client for requirement gatherings

Client - Jarvis Invest - India's First AI Based Advisory Platform

- Revamped the Whole Web application on Reactjs.
- Used Mui for creating custom components
- Created Mobile Application using Ionic and Capacitor
- Implemented Better structure for efficiency and understandable structure.
- Implemented Axios Interceptor for handling custom request and response

React Native Projects: -

Client - Aditya Birla - Channel partner for Aditya Birla

- Created Channel Partner App from scratch.
- Implemented Redux Saga and **Redux persist** for data handling and **Caching**
- Used **React Native Paper** for Ui Library and Re-usable Components
- Implemented **One Signal** to enable **real-time push notifications**, enhancing user engagement and retention.
- APK Generation, Deployment on Play store ensuring smooth deployment process
- Team Management, PR Reviews, client communications, etc.

Client - V5 Global - One of the leading manpower providers and resourcing solutions delivering end to end Sales & Marketing solutions.

- Created **Freelancer** application from scratch Using React native
- Implemented two user journeys according to user type
- Implemented redux for efficient data and state management across mobile App
- Implemented Charts for sales data using Charts Packages
- Integrated Firebase Cloud Messaging (FCM) to enable real-time push notifications, enhancing user engagement and retention.'

Client - Lendenclub -- India's largest P2P Lending Platform

- Maintained and Upgraded the current applications based on React native (Instamoney, Lendenclub)
- Implemented **Mix Panel, Sentry, UXCam** and other SDKs in the React native application
- Upgraded performance of the applications using cache, and other React features for all of the applications
- Implemented ACL for the upgraded application
- Did hotfix/bugfix for the issues from play store reviews
- Integrated Firebase Cloud Messaging (FCM) to enable **real-time push notifications**, enhancing user engagement and retention.
- Deployments for android and web portal on Play Console and Server respectively

Client - Loft -- Dubai Based Salon Application Having stores in 18+ locations

- Upgraded the full react native application.
- Added Caching for better stability including cart items and Products and Improved performance by this
- Fixed issues in booking flow and time
- Communicating with client for issues
- Deployment on Stores

Client - Sarwa – Ecommerce Application

- Enhanced user engagement by integrating push notifications and in-app messaging for order updates and promotional offers.
- Optimized app loading times and responsiveness by leveraging lazy loading techniques and optimizing API calls, resulting improvement in performance.
- Incorporated analytics tools like Google Analytics and Firebase to track user behavior and app performance, enabling data-driven decision-making and feature improvements.
- Implemented flatlist and caching for better stability of application

EDUCATION

Bachelor of Science (Information Technology)

2019 - 2022

MS College of Art, Commerce and Science
7.15 CGPA
